Midterm Project

Introduction to Artificial Intelligence
CSAC 212

Deadline: **Sunday, October 12, 2024**

1 General Instruction

As part of the requirement for this course, each student is required to explore one or more topics discussed in this course. This will be the basis for your Final Project Report. The project proposal concept must be directly related to a topic covered in class, but it may also explore a AI theories and applications that are left unexplored in this course.

You can choose the type of report from the listed categories:

- Applying the methods or techniques you have acquired in the course to a real-world problem. You may find a dataset in any source or in the suggested repositories below and explore it to your desired algorithm.
  - Kaggle Datasets - https://www.kaggle.com/datasets
  - Amazon Datasets - https://registry.opendata.aws/
  - UCI Machine Learning Repository - https://archive.ics.uci.edu/ml/index.php
  - Googles Datasets Search Engine - https://toolbox.google.com/datasetsearch
  - Microsoft Datasets - https://msropendata.com/
  - Awesome Public Datasets Collection - https://github.com/awesomedata/awesome-public-datasets
  - Computer Vision Datasets - https://www.visualdata.io/
  - Lionbridge AI Datasets - https://lionbridge.ai/datasets/
- Designing new algorithms or modifying existing ones to fit a unique class of issues.
- You may also explore theoretical analysis of on the method and techniques that we have discussed in AI.

2 Contents

The Project Proposal are expected to be thorough, yet concise. Broadly, I will be looking for the following:

- **Introduction:** Good motivation for the project and an explanation of the problem statement
- **Related Work:** A review and analysis of past works related to your chosen topic. Identify the what has been done and what are the gaps of these studies. This section should contain 10 or more related work.
- **Methodology:** A description of what step-by-step procedure you are plan to do with your chosen topic. You may discuss here the dataset, learning algorithm, and evaluation tools.
- **References:** List of all sources you've cited in your project proposal.

Format: The report must not be less than 2 pages. Download the LATEX file provided in the CSPC LeOnS and you can use Overleaf to edit the report format. Here is a link on how to edit LATEX file in Overleaf: https://www.overleaf.com/learn/latex/Learn_LaTeX_in_30_minutes

3 Submission

Submit the report on Turnitin Midterm Project Submission Page. Similarity report must be less than 20%. This course will not tolerate any form of academic dishonesty.
